

Subject index

Volume 38 (2005)

- Acne;** Keratinocyte; Peripheral blood mononuclear cell; Cytokine production; Nadifloxacin; *Propionibacterium acnes* **38, 47**
- Acral blistering;** Kindler syndrome; Genodermatosis; Photosensitivity; Actin cytoskeleton; Extracellular matrix **38, 169**
- Actin cytoskeleton;** Kindler syndrome; Genodermatosis; Acral blistering; Photosensitivity; Extracellular matrix **38, 169**
- Adalimumab;** Biologic agents; Psoriasis; Alefacept; Efalizumab; Etanercept; Infliximab **38, 75**
- Aging;** Estrogen; Androgen; Progesterone; Psoriasis; Wound healing; Granuloma pyogenicum **38, 1**
- Alefacept;** Biologic agents; Psoriasis; Efalizumab; Etanercept; Infliximab; Adalimumab **38, 75**
- Androgen;** Estrogen; Progesterone; Psoriasis; Wound healing; Aging; Granuloma pyogenicum **38, 1**
- Asiasari radix** extract; Hair growth; Vascular endothelial growth factor **38, 89**
- Atopic dermatitis;** T cell receptor; BV-gene clonotypes; NC/Nga mice **38, 17**
- Atopic dry skin;** Skin microflora; Biofilm; *Staphylococcus aureus*; *Staphylococcus epidermidis* **38, 197**
- Atopic dry skin;** Skin microflora; *Staphylococcus aureus*; *Staphylococcus epidermidis* **38, 207**
- ATP2A2;** Dyskeratosis follicularis; Darier's disease; Mutation; SERCA2 **38, 231**
- Biofilm;** Skin microflora; Atopic dry skin; *Staphylococcus aureus*; *Staphylococcus epidermidis* **38, 197**
- Biologic agents;** Psoriasis; Alefacept; Efalizumab; Etanercept; Infliximab; Adalimumab **38, 75**
- BV-gene clonotypes;** T cell receptor; NC/Nga mice; Atopic dermatitis **38, 17**
- Cannabinoid receptors;** Cutaneous nerve fibers; Nociception; Itch; Human skin **38, 177**
- Chemokine;** Mycosis fungoides; Cutaneous T cell lymphoma; Interferon- γ **38, 189**
- CML;** Drug eruption; STI571; IL-18; IL-1 β ; ICAM-1 **38, 9**
- CTLA-4;** Microsatellite polymorphism; Vitiligo; DNA; PCR **38, 225**
- Cutaneous nerve fibers;** Cannabinoid receptors; Nociception; Itch; Human skin **38, 177**
- Cutaneous T cell lymphoma;** Mycosis fungoides; Interferon- γ ; Chemokine **38, 189**
- Cytokine production;** Acne; Keratinocyte; Peripheral blood mononuclear cell; Nadifloxacin; *Propionibacterium acnes* **38, 47**
- Darier's disease;** Dyskeratosis follicularis; Mutation; ATP2A2; SERCA2 **38, 231**
- Disulfide bond cross-linking;** Keratin intermediate filaments; In situ hybridization; Human chromosome 11; Scalp **38, 110**
- DNA topoisomerase II gene;** *S. schenckii*; Identification; PCR **38, 99**
- DNA;** CTLA-4; Microsatellite polymorphism; Vitiligo; PCR **38, 225**
- Drug eruption;** STI571; IL-18; IL-1 β ; ICAM-1; CML **38, 9**
- Dyskeratosis follicularis;** Darier's disease; Mutation; ATP2A2; SERCA2 **38, 231**
- Efalizumab;** Biologic agents; Psoriasis; Alefacept; Etanercept; Infliximab; Adalimumab **38, 75**
- Epidermis;** Ultraviolet-B; Keratinocyte; Hyperproliferation; Stem cell **38, 41**
- Estrogen;** Androgen; Progesterone; Psoriasis; Wound healing; Aging; Granuloma pyogenicum **38, 1**
- Etanercept;** Biologic agents; Psoriasis; Alefacept; Efalizumab; Infliximab; Adalimumab **38, 75**
- Extracellular matrix protein 1 (ECM1);** Lipoid proteinosis (LP); Lichen sclerosus (LS); Skin microvasculature; Laser scanning confocal microscopy (LSCM) **38, 215**

- Extracellular matrix**; Kindler syndrome; Genodermatosis; Acral blistering; Photosensitivity; Actin cytoskeleton **38, 169**
- Genodermatosis**; Kindler syndrome; Acral blistering; Photosensitivity; Actin cytoskeleton; Extracellular matrix **38, 169**
- Granuloma pyogenicum**; Estrogen; Androgen; Progesterone; Psoriasis; Wound healing; Aging **38, 1**
- Hair growth**; *Asiasari radix* extract; Vascular endothelial growth factor **38, 89**
- HLA DRB1**; Psoriasis; Keratin17; T cell epitope **38, 25**
- Human chromosome 11**; Keratin intermediate filaments; In situ hybridization; Scalp; Disulfide bond cross-linking **38, 110**
- Human skin**; Cannabinoid receptors; Cutaneous nerve fibers; Nociception; Itch **38, 177**
- Hyperproliferation**; Ultraviolet-B; Keratinocyte; Epidermis; Stem cell **38, 41**
- ICAM-1**; Drug eruption; STI571; IL-18; IL-1 β ; CML **38, 9**
- Identification**; *S. schenckii*; PCR; DNA topoisomerase II gene **38, 99**
- IL-18**; Drug eruption; STI571; IL-1 β ; ICAM-1; CML **38, 9**
- IL-1 β** ; Drug eruption; STI571; IL-18; ICAM-1; CML **38, 9**
- In situ hybridization**; Keratin intermediate filaments; Human chromosome 11; Scalp; Disulfide bond cross-linking **38, 110**
- Infliximab**; Biologic agents; Psoriasis; Alefacept; Efalizumab; Etanercept; Adalimumab **38, 75**
- Interferon- γ** ; Mycosis fungoides; Cutaneous T cell lymphoma; Chemokine **38, 189**
- Itch**; Cannabinoid receptors; Cutaneous nerve fibers; Nociception; Human skin **38, 177**
- Keratin intermediate filaments**; In situ hybridization; Human chromosome 11; Scalp; Disulfide bond cross-linking **38, 110**
- Keratin17**; Psoriasis; T cell epitope; HLA DRB1 **38, 25**
- Keratinocyte**; Acne; Peripheral blood mononuclear cell; Cytokine production; Nadifloxacin; *Propionibacterium acnes* **38, 47**
- Keratinocyte**; Ultraviolet-B; Epidermis; Hyperproliferation; Stem cell **38, 41**
- Kindler syndrome**; Genodermatosis; Acral blistering; Photosensitivity; Actin cytoskeleton; Extracellular matrix **38, 169**
- Laser scanning confocal microscopy (LSCM)**; Lipoid proteinosis (LP); Lichen sclerosus (LS); Extracellular matrix protein 1 (ECM1); Skin microvasculature **38, 215**
- Lichen sclerosus (LS)**; Lipoid proteinosis (LP); Extracellular matrix protein 1 (ECM1); Skin microvasculature; Laser scanning confocal microscopy (LSCM) **38, 215**
- Lipoid proteinosis (LP)**; Lichen sclerosus (LS); Extracellular matrix protein 1 (ECM1); Skin microvasculature; Laser scanning confocal microscopy (LSCM) **38, 215**
- Microsatellite polymorphism**; CTLA-4; Vitiligo; DNA; PCR **38, 225**
- Mutation**; Dyskeratosis follicularis; Darier's disease; ATP2A2; SERCA2 **38, 231**
- Mycosis fungoides**; Cutaneous T cell lymphoma; Interferon- γ ; Chemokine **38, 189**
- Nadifloxacin**; Acne; Keratinocyte; Peripheral blood mononuclear cell; Cytokine production; *Propionibacterium acnes* **38, 47**
- NC/Nga mice**; T cell receptor; BV-gene clonotypes; Atopic dermatitis **38, 17**
- Nociception**; Cannabinoid receptors; Cutaneous nerve fibers; Itch; Human skin **38, 177**
- p53-Specific antibodies**; Tumor marker; Skin cancer **38, 228**
- PCR**; CTLA-4; Microsatellite polymorphism; Vitiligo; DNA **38, 225**
- PCR**; *S. schenckii*; Identification; DNA topoisomerase II gene **38, 99**
- Peripheral blood mononuclear cell**; Acne; Keratinocyte; Cytokine production; Nadifloxacin; *Propionibacterium acnes* **38, 47**
- Photosensitivity**; Kindler syndrome; Genodermatosis; Acral blistering; Actin cytoskeleton; Extracellular matrix **38, 169**
- Progesterone**; Estrogen; Androgen; Psoriasis; Wound healing; Aging; Granuloma pyogenicum **38, 1**
- Propionibacterium acnes***; Acne; Keratinocyte; Peripheral blood mononuclear cell; Cytokine production; Nadifloxacin **38, 47**
- Psoriasis**; Biologic agents; Alefacept; Efalizumab; Etanercept; Infliximab; Adalimumab **38, 75**
- Psoriasis**; Estrogen; Androgen; Progesterone; Wound healing; Aging; Granuloma pyogenicum **38, 1**
- Psoriasis**; Keratin17; T cell epitope; HLA DRB1 **38, 25**
- S. schenckii***; Identification; PCR; DNA topoisomerase II gene **38, 99**
- Scalp**; Keratin intermediate filaments; In situ hybridization; Human chromosome 11; Disulfide bond cross-linking **38, 110**
- SERCA2**; Dyskeratosis follicularis; Darier's disease; Mutation; ATP2A2 **38, 231**
- Skin cancer**; p53-Specific antibodies; Tumor marker **38, 228**

- Skin microflora**; Atopic dry skin; *Staphylococcus aureus*; *Staphylococcus epidermidis* **38**, 207
- Skin microflora**; Biofilm; Atopic dry skin; *Staphylococcus aureus*; *Staphylococcus epidermidis* **38**, 197
- Skin microvasculature**; Lipoid proteinosis (LP); Lichen sclerosus (LS); Extracellular matrix protein 1 (ECM1); Laser scanning confocal microscopy (LSCM) **38**, 215
- Staphylococcus aureus***; Skin microflora; Atopic dry skin; *Staphylococcus epidermidis* **38**, 207
- Staphylococcus aureus***; Skin microflora; Biofilm; Atopic dry skin; *Staphylococcus epidermidis* **38**, 197
- Staphylococcus epidermidis***; Skin microflora; Atopic dry skin; *Staphylococcus aureus* **38**, 207
- Staphylococcus epidermidis***; Skin microflora; Biofilm; Atopic dry skin; *Staphylococcus aureus* **38**, 197
- Stem cell**; Ultraviolet-B; Keratinocyte; Epidermis; Hyperproliferation **38**, 41
- STI571**; Drug eruption; IL-18; IL-1 β ; ICAM-1; CML **38**, 9
- T cell epitope**; Psoriasis; Keratin17; HLA DRB1 **38**, 25
- T cell receptor**; BV-gene clonotypes; NC/Nga mice; Atopic dermatitis **38**, 17
- Tumor marker**; p53-Specific antibodies; Skin cancer **38**, 228
- Ultraviolet-B**; Keratinocyte; Epidermis; Hyperproliferation; Stem cell **38**, 41
- Vascular endothelial growth factor**; *Asiasari radix* extract; Hair growth **38**, 89
- Vitiligo**; CTLA-4; Microsatellite polymorphism; DNA; PCR **38**, 225
- Wound healing**; Estrogen; Androgen; Progesterone; Psoriasis; Aging; Granuloma pyogenicum **38**, 1
